NHS England Getting It Right First Time (GIRFT) National Clinical Psychology Advisor

Role description

GIRFT National Clinical Psychology Advisor for Sickle Cell Disease and Thalassaemia

The Getting It Right First Time (GIRFT) programme is recruiting for a National Clinical Psychology Advisor to focus on the improvement of sickle cell disease (SCD) and Thalassaemia services across England.

Working in collaboration with the ongoing work of the National SCD and Thalassaemia Quality Improvement Programme led by the National Healthcare Inequalities Improvement Programme, the focus of this role will be to reduce the variation in adherence to and delivery of guidelines for SCD and Thalassaemia management. The Infected Blood Inquiry Report, which outlined systemic shortcomings that led to more than 3,000 deaths attributable to infected blood, products and tissue, advises proportionately, given their need for regular transfusion, it is to be expected that people with Thalassaemia or sickle cell disease will have had a significantly higher proportion of blood-borne disease.

The post holder will be experienced in developing and implementing care pathways for children and adults with SCD, Thalassaemia and associated health conditions. The post holder will also have expertise and understanding of service provision for SCD and Thalassaemia in community, primary and secondary care settings, including transition into adult services.

The role will involve working collaboratively with relevant stakeholders including British Society for Haematology, Royal College of Physicians, Sickle Cell Society, UK Thalassaemia Society, NHSE Haemoglobinopathies CRG, NHSBT and UK Forum for Haemoglobin Disorders and others. The Healthcare Inequalities Improvement Programme is a key partner programme as the NHSE Director for Healthcare Inequalities is SRO for Sickle Cell & Thalassemia Pathway Improvement.

GIRFT is an NHS England programme designed to improve the quality of care within the NHS by reducing unwarranted variation and is one of an aligned set of programmes within NHS England.

Please note that this role will be a 12-month post at x 0.1 FTE, retained via memorandum of understanding (MOU) with your host trust, subject to annual review. For further information on this post please email lisa.paget@nhs.net.

GIRFT National Clinical Psychology Advisor: Sickle Cell Disease and Thalassaemia **Position** Getting It Right First Time (GIRFT) Job title GIRFT National Clinical Psychology Advisor: Directorate Sickle Cell Disease and Thalassaemia **GIRFT** Director of Clinical Improvement Pay band Clinical Psychology Advisor Responsible to Salary **SLA** agreement Chair of GIRFT Programme Accountable to Fixed Term (12 months) subject to annual review Providing clinical advice and leadership Responsible for **Tenure** Programme Funded Predominantly home / remote working, with some **Funding** Base requirement to travel **Arrangements**

Getting It Right First Time (GIRFT) is an NHS improvement programme designed to improve the quality of care within the NHS by reducing unwarranted variation.

By tackling variation in the way services are delivered across the NHS, and by sharing best practice between trusts and systems, GIRFT identifies changes that will help improve care and patient outcomes, as well as delivering efficiencies such as the reduction of unnecessary procedures and cost savings. GIRFT is also leading the High-Volume Low Complexity (HVLC) programme, addressing elective recovery post Covid-19, across six specialties throughout England.

Importantly, GIRFT is led by frontline clinicians who are expert in the areas they are reviewing. This means the data that underpins the GIRFT methodology is being reviewed by people who understand those disciplines and manage those services on a daily basis. The GIRFT Clinical Review Unit (CRU) visit every trust carrying out the specialties they are reviewing; investigating the data with their peers and discussing the individual challenges they face. Both local and national recommendations are shared across the specialty and with the regional team, together with verified best practice.

The GIRFT team works with Trusts, Integrated Care Systems (ICS) and specialty networks supporting the implementation of GIRFT best practice pathways, local and national recommendations in order to deliver top decile performance across a range of specialties/sentinel metrics.

The role of the GIRFT National Clinical Psychology Advisor is to:

- Support Dr Wale Atoyebi, GIRFT Sickle Cell and Thalassemia Clinical Lead.
- Provide clinical advice and leadership to identify unwarranted clinical variation within the specialty at national, regional, system, network and trust level
- Provide clinical advice and leadership to identify best practice standards across the specialty
- Provide clinical advice and leadership on the development of appropriate clinical data/metrics to underpin continuous improvement and achievement across the specialty
- Work with GIRFT SMT, NHSE, Sickle Cell Disease (SCD) CRG, clinical stakeholders, to develop and deliver the programme's ambitions to reduce unwarranted clinical variation, and improve the quality and value of healthcare services ensuring clinical focus and credibility
- Support GIRFT in the successful design and delivery of interventions and resources to support system, professional and clinical pathway changes at a national and local level
- Act as a champion for patients and their interests
- Work within NHS England's co-production approach for involving patients, carers and citizens, in the development of commissioning tools and resources
- Embed patient, carer, and public involvement into the organisations' decision making and practice at all levels

The appointment is offered on a fixed term MOU of 12 months at 0.1 WTE, subject to annual review.

Key role specifics and responsibilities

- Undertake a series of review visits, working with teams involved in SCD and Thalassaemia care delivery across the country to identify and understand unwarranted variation in care, the barriers to improvement and examples of best practice.
- Provide support with metric identification, data analysis and validation.
- Identify service-specific recommendations and actions for implementation that will improve quality and outcomes, based on what is learnt from the data and review visits.
- Lead the development of a short national report, highlighting key themes, examples of good practice and recommendations to improve the quality and outcomes for people living with SCD and Thalassaemia.
- To provide national influence and clinical leadership to the health system, focussing on improving outcomes for patients and carers.
- Build effective relationships with other national clinical specialty or programme leads and senior clinical leads from relevant Colleges / professional societies.
- Using benchmarked data, the role involves reviewing process, quality, and productivity in every service in England.
- Support the team's work in developing pathways and promoting best practice.
- Champion the consistent and timely implementation of national policies including NICE technology appraisal guidance and NICE clinical guidelines for medicines at all levels of the NHS.

Workstream Objectives 2025/26

The focus of this role will be to ensure all SCD and Thalassaemia services identify improvement opportunities and plans to address challenges in patients pathways identified in several care pathway reviews. That SCD and Thalassaemia services are providing high quality and efficient care and have, or develop, improvement plans to address the systemic shortcomings and potential racially driven biases identified in various reports.

Key Relationships (Internal and external)

Key Relationships

Operational colleagues may include but are not exclusively limited to:

- Colleagues within the project and programme management job family, the directorate and NHSE.
- NHSE Regional Teams
- NHSE Specialised Commissioning
