

KEY ADVANCES IN CLL

Exciting developments are transforming the treatment landscape for chronic lymphocytic leukaemia, with new therapies and combinations set to redefine care in first-line and relapsed/refractory settings.

Don't miss this exclusive opportunity to join **Associate Professor Mazyar Shadman** and a panel of UK experts for an engaging in-person meeting series around the country. Be part of the discussion as they unpack the latest data and share practical insights on how these advances are shaping real-world clinical practice.
